PROJECTS

- Space Missions |**  Jun' 2025 – Jul' 2025
- Performed end-to-end Exploratory Data Analysis (EDA) on a global space missions dataset using Python, Pandas, NumPy, Matplotlib, and Seaborn.
 - Cleaned and preprocessed the dataset by handling missing values, fixing inconsistencies, formatting dates, and extracting features like **Year**, **Month**, and **Country** for deeper insights.
 - Documented insights, conclusions, and future scope including predictive modeling, geospatial analysis, and dashboard creation.
- Secure File Management System (SFMS) |**  May' 2025 – Jun' 2025
- Built a secure file-management system in Python with role-based access control (Admin/User/Guest) using SQLite for authentication and encrypted password storage with bcrypt.
 - Implemented OTP-based login security using system notifications to generate and deliver one-time passwords for user verification.
 - Developed a command-line dashboard supporting secure operations like viewing, renaming, moving, opening, and deleting files based on user roles.
